

Sujeth M

ABOUT

Motivated and detail-oriented AI & Data Science graduate with a strong foundation in Java, Python, SQL, and full-stack development, experienced in machine learning and software engineering principles, seeking an entry-level Software Developer or AI Engineer role to build scalable, high-performance applications, solve complex problems, and contribute to real-world, production-ready projects in a collaborative, fast-paced environment.

CERTIFICATIONS

- Data Structures and Algorithms using java - Infosys
- Programming using java – Infosys
- Fundamentals of java programming – Board Infinity

KEY PROJECTS

AI-Powered Health Symptom Analyzer

- Built a real-time semantic symptom analyzer using Sentence Transformers + Endee Vector DB + Flask, achieving sub-100ms response time for 15 medical conditions.
- Designed a RAG (Retrieval Augmented Generation) pipeline with cosine similarity search for accurate symptom-to-condition matching from natural language input.
- Integrated Tamil-English bilingual support with a 50+ word medical translation map, enabling native-language symptom input for Tamil-speaking users.

AI-Based Crop Recommendation System using Vector Database

- Built a full-stack precision agriculture AI platform with ChromaDB vector search, 12-dimensional farm embeddings, and Claude AI RAG pipeline to recommend optimal crops from a dataset of 40 crops across 8 categories.
- Engineered a Polynomial Ridge Regression ML model for yield prediction (kg/ha), a disease risk scoring engine matching farm conditions against 15 outbreak vectors, and a companion planting AI using cosine similarity search.
- Integrated live weather forecasting (Open-Meteo API), market ROI calculator (₹ revenue vs input cost per crop), and persistent farm memory via ChromaDB history collection for multi-session tracking.
- **Tech:** Python, FastAPI, ChromaDB, scikit-learn, Claude AI, Anthropic API, HTML/CSS/JavaScript

ACHIEVEMENTS

- Completed Salesforce Administrator Explorer trail on *Trailhead by Salesforce* and earned 20+ badges for completing hands-on learning modules.

SKILLS

Technical Skills:

- Java
- Python
- SQL
- Html and CSS
- JavaScript

Soft skills:

- Critical Thinking
- Creativity
- Problem Solving

Library & Tools:

- Tensorflow
- Matplotlib
- Scikit-learn
- Pandas
- Numpy

EDUCATION

B.Tech. - Artificial Intelligence & Data Science

VSB Engineering College, Karur
2023 - 2027
CGPA – 7.91/10

Higher Secondary Certificate (HSC)

Bala Matric Higher Secondary
School, Vellakovil
2021 - 2023

Percentage: 80.6%

Languages Known

- Tamil
- English
